FLOWABLE Pro3™

PROMOTE • PROTECT • PROLIFERATE

Pro3™-Flowable is a multipurpose, frozen allograft derived from amniotic fluid.

Just as amniotic fluid protects and nourishes the fetus during development, Pro3™-Flowable has the potential to provide the same protection to injured or traumatized tissue. Amniotic fluid contains various proteins that support cell proliferation, movement and differentiation. Amniotic fluid also includes collagen substrates, growth factors, amino acids, polyamines, lipids, carbohydrates, cytokines, extracellular matrix molecules like hyaluronic acid and fibronectin, cells and other chemical compounds that are needed for tissue protection and repair.

Amniotic fluid is rich in the components that are believed to contribute to a wound healing response characterized by minimal inflammatory activity and regenerative rather than scar-mediated healing. These components work to kick-start the body's own rejuvenation and healing process. As an all natural liquid matrix, Pro3™-Flowable Amniotic Fluid Allograft can be easily applied directly at the site of injury, inflammation and pain.

FLOWABLE

Pro3™

PROMOTE • PROTECT • PROLIFERATE

Potential Clinical Applications:

- Orthopedics – augment tendon, fasciae, ligament and capsule repair
- Neurosurgery – chronic neuritis and pain
- Spinal Surgery – facet inflammation
- General Surgery – augment tissue repair

Recommended Preparation Instructions:

- For single patient one time use, Pro3™-Flowable is packaged frozen with a locked cap and is stored at -80°C ± 15°C with a 2 year shelf life. It is intended for use as an additive for surgical applications associated with soft tissue procedures.
- Remove product from cold storage and open outer packaging. Present inner pouch containing the vial to the sterile field. Open inner pouch and thaw in hand.
- Using aseptic technique, draw allograft out of vial with a ~ 30 gauge or larger needle.
- The HCT/P may be implanted directly, or may be mixed with an equal amount of any one of the following diluents prior to surgery:
    - *1% plain preservative-free lidocaine*
    - *Normal saline*
    - *Platelet rich plasma*
    - *Bone marrow aspirate*
    - *Patient's blood*

FDA Regulatory:

- Qualifies as a 361 tissue
- Minimally manipulated
- FDA considers the use of amnion to be for homologous use

Ordering information:

ITEM NUMBER	PRODUCT DESCRIPTION
P01-AMF-0025	Pro3™-F Amniotic Injectable Fluid, 0.25ml
P01-AMF-0050	Pro3™-F Amniotic Injectable Fluid, 0.50ml
P01-AMF-0100	Pro3™-F Amniotic Injectable Fluid, 1.00ml
P01-AMF-0200	Pro3™-F Amniotic Injectable Fluid, 2.00ml
