Innovation. Forward Thinking. Driven.

GAME CHANGERS.

From the onset, Paragon 28® has made it our goal to re-invent the space of foot and ankle surgery. It is not enough for us to develop products. The key is to think about how every foot and ankle problem is addressed and ask questions. Why is the procedure done that way? How can we streamline the procedure and make it more easily reproduced? How can we lower surgeon anxiety when dealing with specific, complex procedures? Where can techniques and solutions available for less researched procedures be improved? We emphasize the philosophy of innovation through design and carry that through for the entire procedure. To us, it's more than just a locking screw or a surgical plate; it's an entire system that makes foot and ankle surgery go more smoothly.

Paragon 28® envisions an empowered foot and ankle surgical community, one which is able to provide tailored solutions to the population suffering from medical conditions and ailments of the lower extremities.

We want to help get people moving again.

Par-a-gon (noun)

Paragon - An ideal instance; a perfect embodiment of a concept. A model or pattern of excellence or perfection.

Twen-ty-eight (noun)

Twenty-eight - The second perfect number. The number of bones in the human foot including the sesamoid bones.
